GUESS WHO?!

This closeted pop star thought he could bring his lover to a Halloween costume party and no one would notice. While the boyfriend's heavily made up face concealed his identity, everyone knew exactly who he was. The good thing is that nobody cared. It's been the biggest open secret in Hollywood for years – even his ex-girlfriend knew.

Denzel's COCAINE DRAMA

Busted! There's apparently a serious cocaine problem on the set of Denzel Washington's new movie, *The Equalizer 3*. On Nov. 1, Italian paramilitary police raided the hotel rooms of two of the movie's caterers, seizing more than 120 grams of cocaine. The raid took place after the head of the film's catering service suddenly died of a heart attack on Oct. 31. Several small packages of cocaine were subsequently found in the man's clothing, raising suspicions that there could be more drugs on the production's premises. "This is a big scandal," says a source close to the *Flight* actor. Denzel, 67, "knew nothing about what was going on, obviously, and measures are being taken so something like this never happens again." *The Equalizer 3* also stars Dakota Fanning.

John to Chrissy: NO MORE PLASTIC SURGERY!

GOING OVERBOARD?

Enough! That's what John Legend is telling wife Chrissy Teigen when it comes to getting more plastic surgery. The model and actress, 36, has had buccal fat removal from her cheeks, a boob job, an eyebrow transplant and liposuction on her armpits. "She has had even more procedures, and John wants her to stop," a source tells *In Touch*. "He thinks she's taking it too far." But Chrissy isn't likely to listen – she insists she has "no regrets" about the work she's had done. John, 43, adds the source, "is at a loss."
